FATHUL HIDAYAT

Software Developer (Mobile & Backend)

fahtul.singaparna@gmail.com | +6281313320710 | Tasikmalaya, West Java | linkedin.com/in/fathul-hidayat-dev

github.com/Kirara02

SUMMARY

Experienced software developer with 3 years of programming experience, specializing in cross-platform mobile development (Flutter), native platforms (Android/iOS), and backend development (Go, .NET). Successfully published 10+ applications on Google Play Store and 1 application on Apple App Store. Expertise in full-stack development, real-time communication (WebSocket), and modern architecture patterns. Remote-work ready with strong experience in asynchronous communication, agile methodologies, and distributed team collaboration. Passionate about building scalable, maintainable applications with clean code principles and CI/CD practices.

EXPERIENCE

Mobile Developer

PT UniGuard Indonesia — August 2024 - Present

Developed and maintained mobile applications for both cross-platform (Flutter with Riverpod) and native platforms (Kotlin, Java, Swift). Experienced in full app lifecycle from development to Play Store publishing. Implemented real-time communication features using WebSocket and push notifications with Firebase Cloud Messaging (FCM). Translated business requirements into functional and scalable software solutions. Worked closely with cross-functional teams to design and implement new features. Optimized application performance and resolved technical issues. Maintained clean, modular, and well-documented code for future development.

Flutter Mobile Developer

PT Zen Multimedia Indonesia — June 2023 - July 2024

Designed and implemented new features in mobile apps using Flutter, implemented BloC architecture, fixed bugs, and learned best practices in software development.

Android Developer, Internship

Prahwa — July 2022 - October 2022

Learned Dart and Flutter from basic, slicing UI design from Figma, created example projects, and implemented BloC state management and clean architecture.

SKILLS

Mobile Development

Flutter · React Native · Kotlin Multiplatform

Android Development

Kotlin · Java

iOS Development

Swift

Backend Development

Go · .NET

Desktop Development

C#

IoT Development

Python

Web Development

JavaScript · Laravel

Tools & Technologies

VS Code · Android Studio · Xcode · Postman · Git · GitHub · GitHub Actions · Figma · Trello · Discord · Docker · Firebase · PostgreSQL · SQLite

EDUCATION

Software Engineering

SMK YPC Tasikmalaya

2023

Graduated as top student in Software Engineering program. Specialized in software development, programming fundamentals, and practical application development.

PROJECTS

UniGuardZ

Flutter, Kotlin, Swift, SQLite, REST API, Google Maps , Firebase Cloud Messaging

UniGuard Z is the next generation staff presence, guard tour management and location verification platform developed from over 20 years of experience in the Australian security and hygiene industry. Designed to be incredibly simple and flexible enough to capture the exact data you need, delivered straight to your inbox! UniGuard has successfully fought public litigation claims, secured payment for services rendered and streamlined your workforce operations by helping to ensure data transparency across your workforce.

📱 Play Store 🍎 App Store

NetGuard

Android, iOS, Kotlin, Compose Multiplatform, SQLDelight, REST API, Background Tasks, Firebase Cloud Messaging, Stripe, Sendgrid, Website, Go-Fiber, Next.js

NetGuard is a comprehensive server monitoring application built with Kotlin Multiplatform, designed to help employees stay informed about server status and ensure timely maintenance. The app provides real-time server monitoring, incident reporting, and comprehensive analytics to keep your infrastructure running smoothly.

📱 Play Store 🍎 App Store

NoiseHub

Flutter, Riverpod, REST API, Firebase Cloud Messaging

Noise Hub is a professional-grade noise monitoring application that gives you real-time visibility into ambient sound levels across multiple sensor locations — right from your mobile device. Whether you're managing an industrial facility, monitoring workplace safety, or overseeing environmental noise compliance, Noise Hub connects seamlessly to your hardware sensors and delivers live data where you need it.

📱 Play Store 🍎 App Store

ThermoGuard

Flutter, Riverpod, REST API, Go-Fiber, Firebase Cloud Messaging

An enterprise-grade mobile application developed with Flutter, designed to interface with the Temperature Monitoring Server. This application provides real-time environmental monitoring, sophisticated asset management hierarchy, and robust administrative controls.

📱 Play Store 🍎 App Store

MPASS

Android, Kotlin, Jetpack Compose, RFID SDK, REST API

MPASS is a premium Android application designed for cruise ship passenger management, focusing on safety, boarding efficiency, and emergency evacuation tracking using UHF RFID technology.

💻 GitHub

Assets Track RFID

Kotlin, REST API, RFID SDK

The Assets Track RFID app is designed specifically for handheld devices equipped with RFID capabilities. The application leverages specialized SDKs provided by handheld device manufacturers to enable seamless RFID tag reading and management. It provides an intuitive interface for tracking and managing various items, batches, and transactions through integrated RFID scanning capabilities.

📱 Play Store

PTT Uniguard

Java, REST API, WebSocket, Mumble Server, Google Maps API

Introducing UNIGUARD PTT, a modern communication solution designed to simplify and accelerate your team's communication. In this digital era, we understand that speed, efficiency, and security are key to maintaining smooth

business or organization operations. Uniguard PTT is here as an answer to these needs by offering a reliable and easy-to-use Push-to-Talk (PTT) platform.

📱 Play Store

GPS Uniguard

Flutter, Local Auth, WebView, Caching

GPS Uniguard is a mobile application for managing GPS tracking devices. It requires a Traccar server instance to work.

📱 Play Store 🍎 App Store

Bebunge

Flutter, Bloc, REST API, Google Maps API

Bebunge is a One-Stop Portal Service owned by the Bekasi Regency Communication, Informatics, Cryptography and Statistics Service. With Bebunge, the public will get information about government programs and other information. The Bebunge application functions as an application for complaints and aspirations from the public which will then be forwarded to the relevant section for follow-up.

📱 Play Store

Prosmart

Flutter, Bloc, REST API

ProSmart application is the first free online evidence return application in Indonesia. You can download this ProSmart application on Playstore. In this application you can check your belongings that have been used as evidence in court at the Cikarang District Court

📱 Play Store

BLE Uniguard

Kotlin, REST API, BLE

BLE Uniguard is a mobile application for managing BLE tracking devices. It requires a Traccar server instance to work.

📱 Play Store

ACHIEVEMENTS

- 10+ published apps on Play Store & App Store
- Full-stack Flutter + Go development
- Real-time WebSocket communication
- Cross-platform & native expertise
- Clean architecture & modern patterns
