// PROFESSIONAL SUMMARY

```
/*
Experienced software developer with 3 years of programming
experience, specializing in cross-platform mobile development
(Flutter) and native platforms (Android/iOS). Successfully
published 6+ applications on Google Play Store and 1
application on Apple App Store. Expertise in full-stack
development with Go backend, real-time communication
(WebSocket), and modern architecture patterns. Remote-work
ready with strong experience in asynchronous communication,
agile methodologies, and distributed team collaboration.
Passionate about building scalable, maintainable applications
with clean code principles and CI/CD practices.
*/
```

// TECHNICAL SKILLS

MOBILE DEVELOPMENT

- Flutter
- React Native
- Kotlin Multiplatform

ANDROID DEVELOPMENT

- Kotlin
- Java

IOS DEVELOPMENT

BACKEND DEVELOPMENT

Swift

Go

DESKTOP DEVELOPMENT

C#

IOT DEVELOPMENT

Python

WEB DEVELOPMENT

JavaScript Laravel

TOOLS & TECHNOLOGIES

VS Code Android Studio Xcode Postman Git GitHub Figma Trello Discord Docker Firebase PostgreSQL SQLite

// EDUCATION

Software Engineering

SMK YPC Tasikmalaya

2023

Graduated as top student in Software Engineering program. Specialized in software development, programming fundamentals, and practical application development.

// KEY PROJECTS

UniGuardZ

Tech: Flutter, Kotlin, Swift, SQLite, REST API, Google Maps , Firebase Cloud Messaging

// UniGuard Z is the next generation staff presence, guard tour management and location verification platform developed

from over 20 years of experience in the Australian security and hygiene industry. Designed to be incredibly simple and flexible enough to capture the exact data you need, delivered straight to your inbox! UniGuard has successfully fought public litigation claims, secured payment for services rendered and streamlined your workforce operations by helping to ensure data transparency across your workforce.

📱 Play Store | 🍎 App Store

PTT Uniguard

Tech: Java, REST API, WebSocket, Mumble Server, Google Maps API

// Introducing UNIGUARD PTT, a modern communication solution designed to simplify and accelerate your team's communication. In this digital era, we understand that speed, efficiency, and security are key to maintaining smooth business or organization operations. Uniguard PTT is here as an answer to these needs by offering a reliable and easy-to-use Push-to-Talk (PTT) platform.

📱 Play Store

GPS Uniguard

Tech: Flutter, Local Auth, WebView, Caching

// GPS Uniguard is a mobile application for managing GPS tracking devices. It requires a Traccar server instance to work.

📱 Play Store | 🍎 App Store

Assets Track RFID

Tech: Kotlin, REST API, RFID SDK

// The Assets Track RFID app is designed specifically for handheld devices equipped with RFID capabilities. The application leverages specialized SDKs provided by handheld device manufacturers to enable seamless RFID tag reading and management. It provides an intuitive interface for tracking and managing various items, batches, and transactions through integrated RFID scanning capabilities.

📱 Play Store

NetGuard

Tech: Android, iOS, Kotlin, Compose Multiplatform, SQLDelight, REST API, Background Tasks, Firebase Cloud Messaging, Website, Next.js

// NetGuard is a comprehensive server monitoring application built with Kotlin Multiplatform, designed to help employees stay informed about server status and ensure timely maintenance. The app provides real-time server monitoring, incident reporting, and comprehensive analytics to keep your infrastructure running smoothly.

📱 Play Store 🍎 App Store

NoiseHub

Tech: Flutter, Riverpod, REST API, Firebase Cloud Messaging

// Noise Hub is a professional-grade noise monitoring application that gives you real-time visibility into ambient sound levels across multiple sensor locations — right from your mobile device. Whether you're managing an industrial facility, monitoring workplace safety, or overseeing environmental noise compliance, Noise Hub connects seamlessly to your hardware sensors and delivers live data where you need it.

📱 Play Store 🍎 App Store

ThermoGuard

Tech: Flutter, Riverpod, REST API, Firebase Cloud Messaging

```
// An enterprise-grade mobile application developed with
Flutter, designed to interface with the Temperature
Monitoring Server. This application provides real-time
environmental monitoring, sophisticated asset management
hierarchy, and robust administrative controls.
```

📱 Play Store | 🍎 App Store

Bebunge

Tech: Flutter, Bloc, REST API, Google Maps API

```
// Bebunge is a One-Stop Portal Service owned by the Bekasi
Regency Communication, Informatics, Cryptography and
Statistics Service. With Bebunge, the public will get
information about government programs and other information.
The Bebunge application functions as an application for
complaints and aspirations from the public which will then
be forwarded to the relevant section for follow-up.
```

📱 Play Store

Prosmart

Tech: Flutter, Bloc, REST API

```
// ProSmart application is the first free online evidence
return application in Indonesia. You can download this
ProSmart application on Playstore. In this application you
can check your belongings that have been used as evidence in
court at the Cikarang District Court
```

📱 Play Store

BLE Uniguard

Tech: Kotlin, REST API, BLE

// BLE Uniguard is a mobile application for managing BLE tracking devices. It requires a Traccar server instance to work.

Play Store

XChat - Real-time Chat App

Tech: Flutter, Go, WebSocket, Riverpod, Clean Architecture, JWT, PostgreSQL, Google Gemini API, OpenAI API, AI Integration

// A comprehensive real-time chat application with Flutter frontend and Go backend. Features user authentication, private/group chats, real-time messaging via WebSocket, and AI integration with Google Gemini and OpenAI ChatGPT. Users can interact with AI assistants directly within chat rooms through tools-level integration. The project demonstrates full-stack development capabilities with modern technologies and AI/ML integration.

GitHub

// ACHIEVEMENTS

- Successfully developed and published 7+ applications on Google Play Store and Apple App Store
- Built full-stack applications with Flutter frontend and Go backend
- Experienced in real-time communication systems using WebSocket
- Proficient in both cross-platform and native mobile development

- Strong expertise in modern architecture patterns and clean code principles
